

MicroSociety Academy Indoor Air Policy

In order to ensure that all school buildings have adequate indoor air quality, the Board directs the Executive Director to address methods of minimizing or eliminating emissions from buses, cars, delivery vehicles, and other motorized vehicles. The Executive Director may delegate the implementation of these methods to appropriate staff. The Board encourages the Executive Director to utilize methods and recommendations established by various State agencies.

In addition to addressing methods of eliminating emissions, the Executive Director is responsible for an annual inspection of the air quality in the school buildings using a checklist provided by the New Hampshire Department of Education.

In support of this policy, the Executive Director is authorized to establish regulations and/or administrative rules necessary to implement anti-idling and clear air measures aimed at improving indoor air quality.
